# Highlights

## WHO CAN INSTALL THE LANGUAGE PACK and HOW TO CHECK FOR UPDATES?

**WHO:** Users with AP8.9 bit, AP5.9 bit or AP4.9 bit that would like to change the Software language

**WARNING:** The AP bit SW and FW version needs to be updated to the latest versions available on the Audison bit Drive Portal (i.e. Minimum **SW v.2.0.0.4.21585** and **FW v. 2.0.0.24**).

**HOW TO CHECK FOR UPDATES and WHERE TO FIND THEM:** The language packs are constantly revised and updated by our R&D Division. Users have 3 ways to look for language packs:

**A. Pre-loaded on SW:** the official language packs are automatically installed during every SW installation (refer to the SW release notes). The language packs are selectable with the PC SW through the "File->Preferences" menu.

**B. Inside the folder "Language pack" contained in the SW full package compressed folder:** the preliminary language packs are contained in the folder "lang" that users can find in the root of the SW full package compressed folder, downloadable from the Audison bit Drive Portal.

**C. Online:** the latest language packs are available on the Audison bit Drive Portal [www.audisonbitdrive.eu](http://www.audisonbitdrive.eu). Users can easily check for updates using the function "download language pack online", selectable with the PC SW through the "File->Preferences" menu.

**WHAT ARE THE STEPS TO LOAD THE LANGUAGE PACK FOR THE ABOVE LISTED B. and C. CASES?**

Please, note the steps to take as follows:

1. Select and Copy the language pack file that you previously downloaded (case B. or C.)

2. Open the "AP bit" folder following the following path from your Computer's root:

**WIN 7 / 8 / VISTA:** *C:\Users\[username]\AppData\Roaming\Audison\AP bit*

**XP:** *C:\Documents and settings\[username]\Application data\Audison\AP bit.*

3. Open the folder "lang" and paste into it the language pack file (e.g. "German.lang")

4. Launch the PC SW and select the language from the drop-down menu: File->Preferences->Options
